Mr. James HatcherPikeville, Ky.

OFFICERS OF THE BOARD OF TRUSTEES.

Rev. John Barbour, D. D.....President.
Rev. W. C. Condit, D. D.....Secretary and Treasurer.

FACULTY.

REV. JAMES F. RECORD, Principal,
Bible and School Management.

MISS IDA M. TAYLOR,
Training School, Methods.

MISS ROSE M. LESSLEY,
English, History and German.

MR. P. D. BEVINS,
Teachers' Course, Mathematics.

MR. JAMES R. BOAL,
Latin, Greek, Higher Mathematics.

MISS ELIZABETH McMARTIN,
Music and Grade Work.

MR. K. F. JOHNSON,
Business Course.

MISS GRACE BEENY,
Primary Department.

COURSE OF STUDY.

COLLEGIATE DEPARTMENT.

This embraces two courses, the Classical and the Scientific. There are two years given to this department and students completing either of the courses are prepared for entrance to the Freshman class in the best Colleges, to the course which he has pursued. The Classical course includes the studies usually required in American colleges for entrance to Freshman class. The scientific course is especially designed for those who for any reason cannot complete a full college course, or who are studying for the degree of B. Sc., and fits for entrance to the Freshman class leading to that degree. Electives are allowed in the second year of this course to students who do not expect to complete a full college course.

PREPARATORY DEPARTMENT.

This embraces three years work. The first two years includes the work usually required in 7th and 8th grade, including also easy Latin and Elementary Algebra, which is begun at the beginning of the winter term of the second year. The third year the class completes Elementary Algebra, English Grammar, United States History, Elements of Civics and has Latin four hours a week.

TEACHERS' COURSE.

For the accommodation of those who teach in the free schools during the Summer and Autumn, a Teachers' course will be maintained during the third and fourth terms—five months in the two terms. This course will embrace a thorough study of the branches required by the School Law of Kentucky for teachers' certificate,

including the subjects required for a State certificate. The thoroughness with which this course is pursued is evident from the results of the teachers' examination. There have been very few failures in teachers' examination in the past five years.

MUSIC DEPARTMENT.

We would especially call attention of parents, who wish to give their daughters a musical education, to this department.

Because of the connection of this department with the Academic department of the school, students can pursue a course of music here the equivalent of which in a special college of music would cost more than three times as much. Besides music students can pursue Academic studies in connection with the music.

INTERMEDIATE AND PRIMARY.

At the urgent request of many of the parents of Pikeville, we will continue the Intermediate and Primary departments. So long as the school continues these departments no pains will be spared to make them the very best possible. Expert teachers will be secured and the latest methods in child-training will be used. This work will be done in the training school under the supervision of Miss Ida M. Taylor, of whom Prof. George, head of the training school of the Ypsilanti State Normal, Michigan, says: "She is the best training teacher I ever saw at work." Miss Taylor will be ably assisted by Miss Roberta Sandusky.

BUSINESS COURSE.

This course embraces book-keeping, penmanship, commercial arithmetic, business forms, stenography and typewriting. No pains will be spared to make this course as thorough and complete as can be had in any business school south of the Ohio river.

HISTORY.

Pikeville Collegiate Institute was founded by Ebenezer Presbytery, Synod of Kentucky, at Pikeville, Kentucky, in 1888. The school was opened in the autumn of the following year. It has been most loyally supported by the churches of Ebenezer Presbytery and particularly by the Woman's Missionary Societies of the Presbytery, working through the Woman's Home Missionary Board of the church. An addition erected last year doubles the capacity of the school building and quite meets the present demands of the school for its academic work. Hendrick's Hall will accommodate the lady teachers and about twenty lady boarders. It is inadequate to meet the demands. A boy's dormitory is very much needed.

LIBRARY.

We have received this year more books through the Rev. Geo. A. Joplin for the Hitchcock Memorial library. These, with those received last year have been a great addition to the library. Dictionaries have been received from Mr. Foster of Ashland church and Rev. John Barbour, D. D., Maysville. Also the Century Dictionary and Cyclopedia from Hon. John Wanamaker. The school is very well supplied now with dictionaries, but we need a good encyclopedia. The reading room is supplied with more than twenty of the leading magazines and periodicals. Through the generosity of friends a small circulating library will soon be put in the county through this library.

SUPPORT.

It is the purpose of the Board of Trustees that this school shall maintain the traditions of the Presbyterian church for its superior educational facilities. The school now enjoys the reputation of being the best in Eastern Kentucky. The tuitions received are

not nearly sufficient to support the school at the standard set. Friends of education from different sections of the church have contributed generously to supplement the tuitions and thus make it possible to meet our current expenses from year to year. The school ought to have at least \$100,000 as a productive fund.

SCHOLARSHIPS.

Scholarships were provided this year by Mr. W. H. Averill, Mr. F. C. Dudley, Mr. A. E. Auxier, Miss Ida M. Taylor, The Woman's Missionary Society of Falmouth, Ky., The Young Ladies' Missionary Society, of Point Breeze Presbyterian church, Pittsburg, Pa., The Junior Society of Presbyterian Church, Frankfort, Ky., Primary Sunday school Class of the same church, a "Friend," Ashland, Ky., and the Northern Coal and Coke Company.

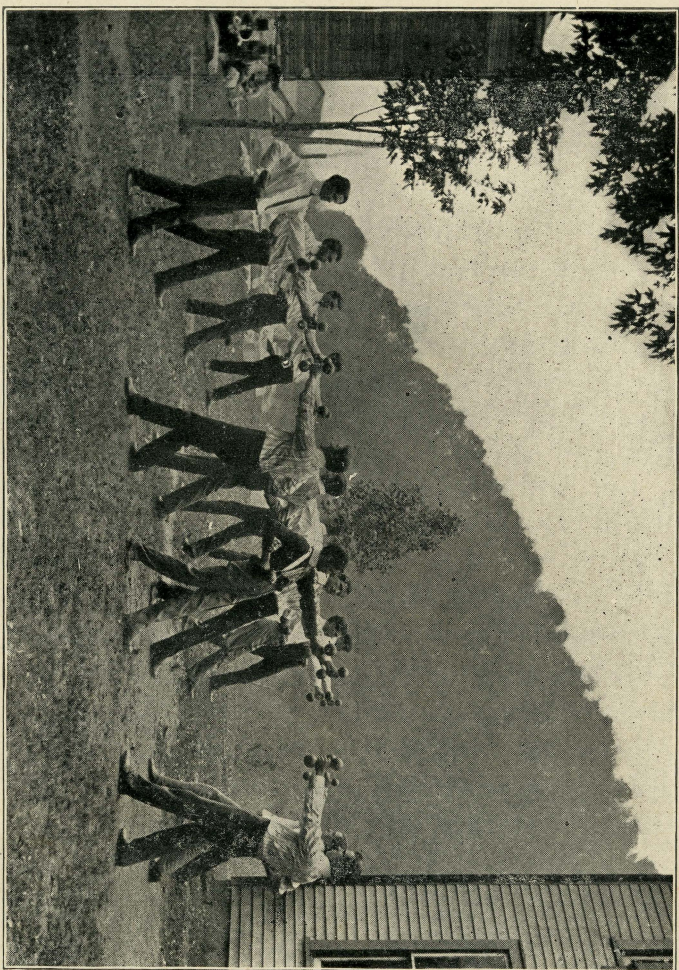

Twenty dollars pays the tuition of a student in the school for one year.

ADMISSION.

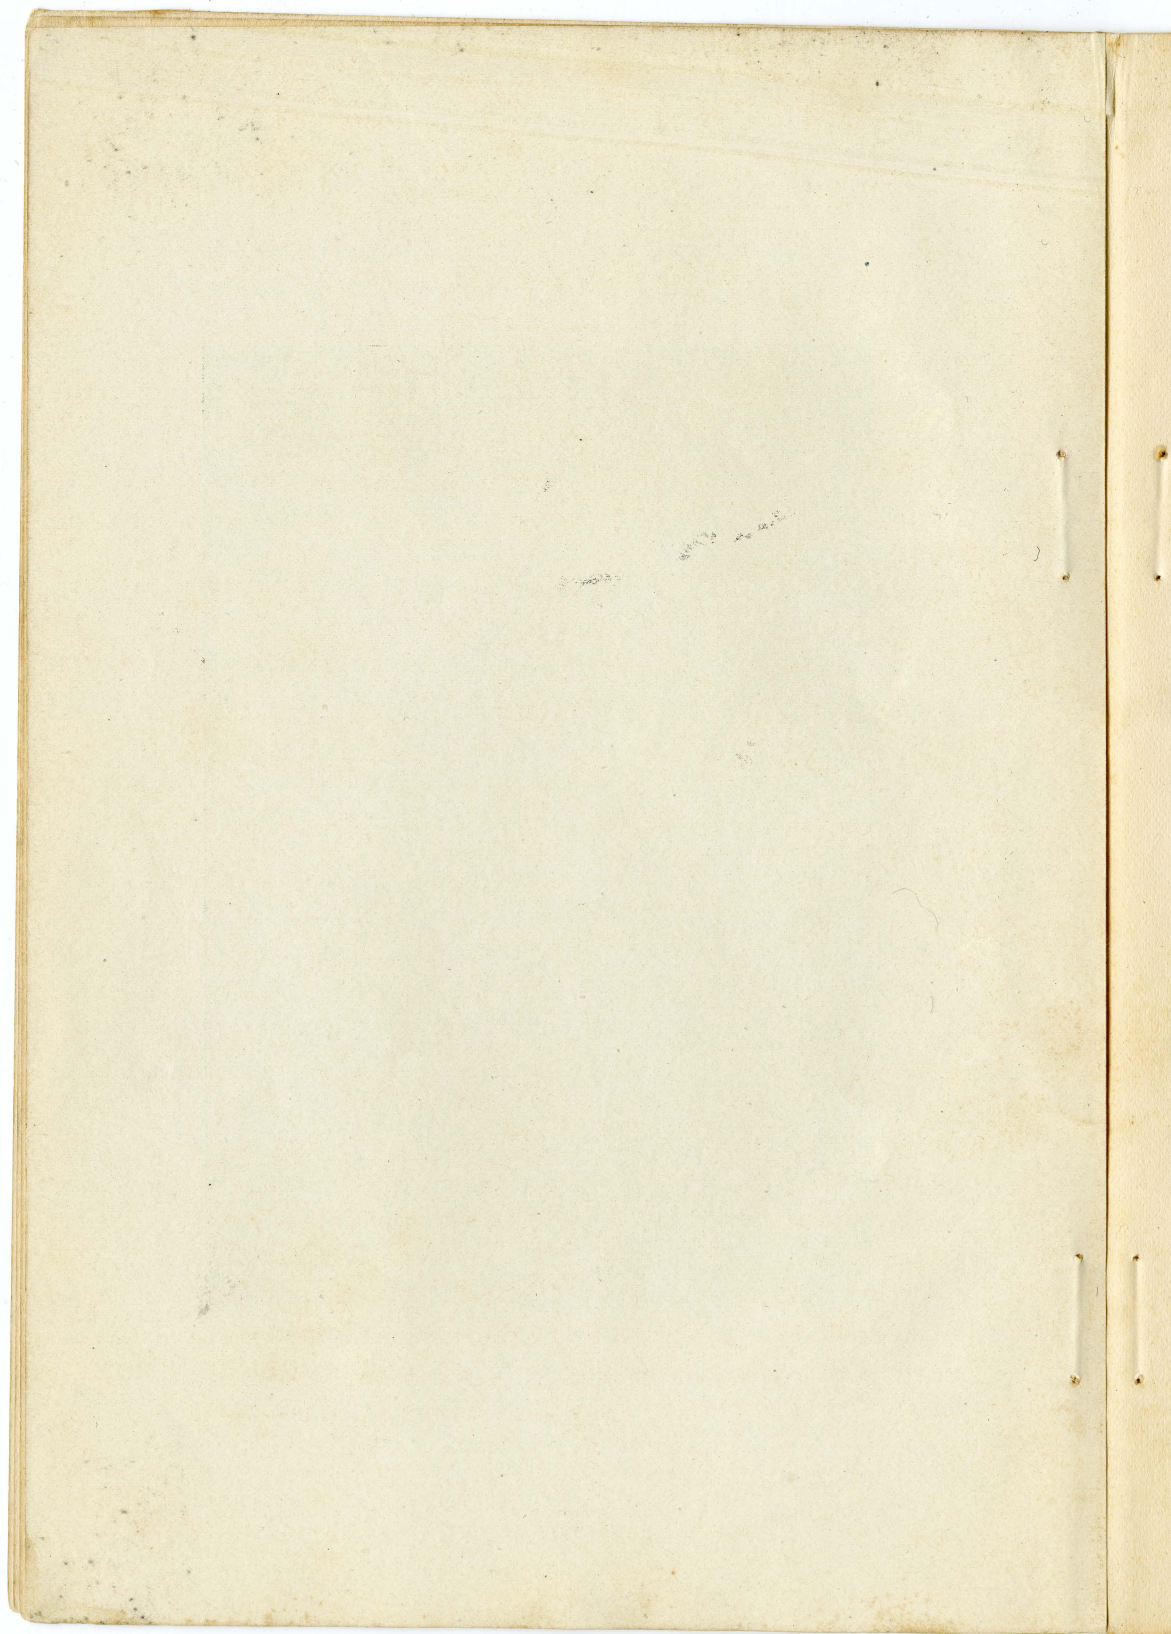

For entrance to the preparatory department a student must pass a satisfactory examination in English Grammar to Syntax, including analysis of the simple sentences. Arithmetic to percentage, elementary United States History, elementary physiology, political geography, reading and spelling.

For entrance to the collegiate department, classical course, he must pass a satisfactory examination in Elementary Algebra (Ray), Arithmetic, English Grammar, including composition, Latin Lessons and Grammar, Physical Geography, United States History, Elements of Civics, and first steps in English and American Literature.

Students who are classified as "special" are permitted to enter any class by satisfying the faculty of their preparation for entrance to the subject to be pursued.

The figures mark the hours per week.

MATHEMATICS.

Arithmetic—The first year of the Preparatory is given to a thorough study of Common and Decimal Fractions, Denominate numbers and Proportion. The second year to a thorough study of Percentage and its application, Square and Cube Root and its applications. Third year to Raub's Complete Arithmetic.

Algebra—Two full years are given to the study of Algebra, completing Ray's Elementary Algebra and Wentworth's School Algebra.

Geometry—Geometry is completed and one term given to Plane and Spherical Trigonometry.

ENGLISH.

The first two years are given to Orthography and Etymology with the analysis of simple sentences. Special attention is devoted to letter writing and memorizing short selections. The third year is given to analysis, False Syntax and Composition. Paragraph writing is begun. Narratives and descriptions are distinguished, and models for both are carefully studied. The aim here is for clearness of thought, so that conciseness and accuracy of expression will follow. A certain amount of outside reading from English and American authors is required. This is discussed in class and used as a basis for the work in composition. During the first and second terms essays are written once a month, corrected and re-written. During the third and fourth terms essays are written weekly. Exercises in dictation are given throughout the year. Emphasis is placed upon sentence structure and the correct use of words.

First year of Collegiate work—For careful study, in class: Shakespeare's Merchant of Venice, Irving's Sketch Book, Haw-

thorne's Short Stories, Scott's Lady of the Lake, and paragraph work from Scott and Denny's Composition-Rhetoric.

Second year—For careful study: De Quincey's Flight of a Tartar Tribe, (or Burke's Conciliation with America), Shakespeare's Macbeth, Woddy's Rhetoric and a brief outline of English Literature. In both years Collegiate work, compositions based upon reading and text-book, and description and narratives taken as far as possible from the pupil's daily life and experience, are required once a week. Emphasis is placed upon paragraph structure, vocabulary, and ease, force and elegance of expression. Some attention is given to the planning of long themes. At least three are required.

During the last year of the Preparatory work and the two Collegiate years, at least fifteen books out of a carefully selected list of thirty must be read outside.

HISTORY.

Three years are devoted to the study of United States History as given in the ordinary text books on that subject. Barn's and Montgomery's histories will be used as text books and during the last half of the third year a more exhaustive treatise will be read in connection with class room work.

CIVICS.

This subject will be studied both years of the Collegiate course. The first year will be given to the study of Fisk's Civil Government and the second year to Andrew's Manual. Students will be required to read the first volume of Bryce's American Commonwealth during the last term of Senior year.

GEOGRAPHY.

The first two years and half of the third, are given to the study of Political Geography, and last half of the third to Physical Geography. Text books: Electric Kentucky Edition and Houston's Physical Geography.

LATIN.

The study of this language will begin with the winter term of the second year preparatory course and continue through the Collegiate course. From the beginning accuracy in pronunciation, and in knowledge of inflectional forms is required. The work of the first year consists in acquiring the elementary principles of the language and reading easy selections in preparation for the more difficult reading of Cæsar. Particular attention is given to the study of the Grammar through the entire course.

Text Books: Collar and Daniell; Cæsar, Cicero and Virgil, Allen and Greenough; Latin Grammar, Allen and Greenough.

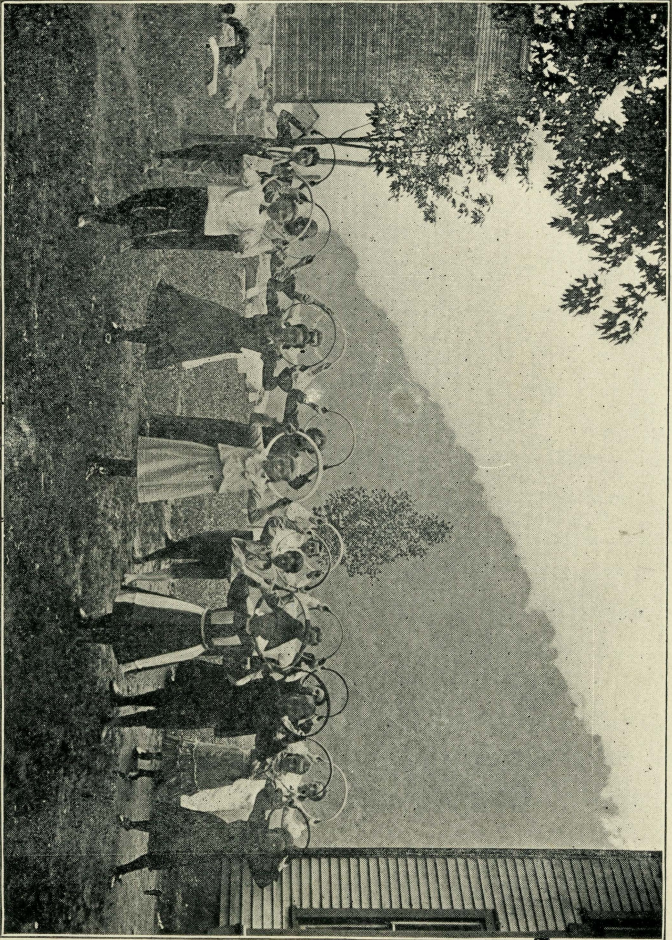

GREEK.

The study of Greek is begun with last year of the Preparatory course and extends through the Collegiate course. We aim to make the work in the preparatory study of this branch most accurate and thorough, devoting a very considerable time to the study of the grammar and the acquisition of a vocabulary. Especial attention is given to Greek composition during the first two years, in exercises adapted to student's knowledge of the Greek Grammar.

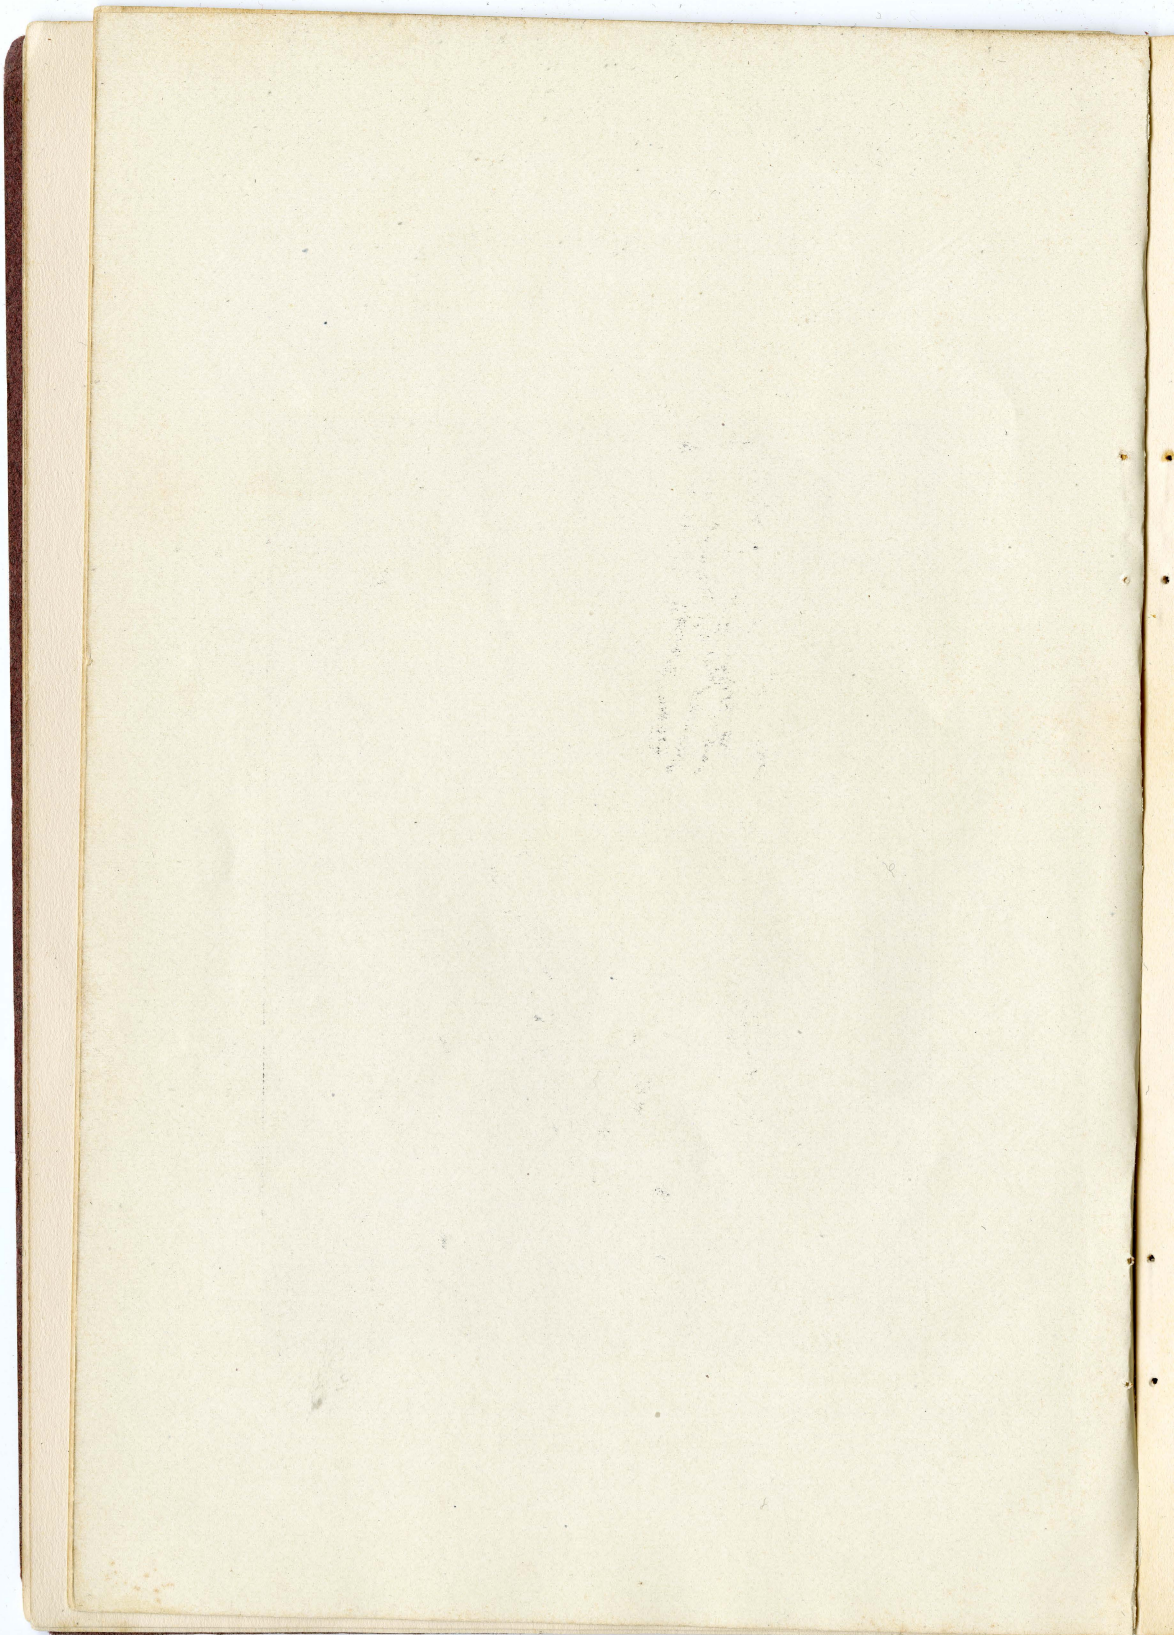

Text Books: Harper and Water's Inductive Greek Method; Goodevin's Greek Grammar; Harper and Wallace's Anabasis.

TEACHER'S COURSE.

Subjects pursued in the Teacher's Course—Ray's Higher Arithmetic is taught beginning with Percentage and completed

HOOP DRILL.

with a review of Common and Decimal Fractions, Longitude and Time and Proportion. Should any of the teachers not be prepared for the Higher Arithmetic another class in this subject will be formed. Five periods each week of forty-five minutes each are given to this subject.

Reed and Kellogg's Grammar is used as a text in English grammar and Swinton's English Composition. Five periods each week are given to this subject. Special attention is given to analysis, diagrams and parsing in grammar, definitions, construction of sentences, letter writing, etc., in composition.

United States History, Civics, Geography and Physiology are thoroughly and systematically reviewed. Three periods a week are given to United States History, two to Geography, three to Civics, two to Physiology. Spelling is regularly taught.

Two periods each week are given to Methods of Teaching with Page's Theory and Practice of Teaching as a text and three periods to Psychology as applied to teaching, with McLellan as a text.

Written reviews are given at the end of each month and the papers read and mistakes noted by the instructor. The papers are then returned to the student who is expected to make corrections.

INTERMEDIATE AND PRIMARY.

The work done in these two courses is equivalent to that done in the first grades of our best city schools. The text books are those used in the public school of Pike county with few exceptions.

MANAGEMENT.

The Institute is under the management of a Board of Trustees the members of which are appointed by Ebenezer Presbytery. The Principal of the school is appointed by this Board and Commissioned by the Woman's Board at New York City.

MODEL SCHOOL.

A training school will be organized in which student teachers will have actual experience in teaching under the supervision of a skilled training teacher. Work will be done in this department in the first seven grades. Each week's work of the entire school year will be outlined and placed in the hands of the assistant and student teachers. Each day each student teacher will either teach one class in the presence of the supervisor of the department or one of her assistants, or will be present while one of the training teachers is teaching a class. The student teachers will also meet with the training teachers once each week when they will be instructed in the latest methods of teaching. Miss Ida Taylor, who was for four years training teacher in the Ypsilanti State Normal School, Michigan, will be supervisor of this department, assisted by Miss Roberta Sandusky.

Our model school will serve two purposes: First, it will offer to the patrons of our school who have children in the first seven grades instructions by and under the direction of skilled training teachers. Only the latest and best methods of teaching will be used. That boy who has come under the tuition of a skillful teacher the first eight years of his school life has a fairly good knowledge of the common branches. But what is better he has learned how to study and to desire knowledge for knowledge's sake and although circumstances should prevent his being in school longer he will not cease to be a student. That child who hates school will almost invariably be found to have acquired his hatred for school and school work because of an incompetent, lifeless teacher. Second, it will offer to the teachers and those preparing to teach superior opportunities of professional training. Young men and women graduating from

our school and who have had practice in the model school for two sessions will be assisted in securing positions in graded schools.

PHYSICAL CULTURE.

Physical culture will be a regular feature of our work. The Swedish system will be used. The purpose of this will be to correct improper positions of sitting, standing and walking; to develop the chest and lung expansion; to develop a symmetrical figure and give graceful carriage.

So important does the State of Pennsylvania regard physical training in the education of her youth, that the legislature of that State has made the teaching of it compulsory in all public schools and requires all public school teachers to pass an examination in it.

VOCAL MUSIC.

Singing will be taught in all grades. Instruction will be given in the rudiments of vocal music, the pupil being taught to sing by note.

LOCATION.

Pikeville is the county seat of Pike county, Kentucky, situated at the head of navigation on the Big Sandy River. It is the best town in the Sandy Valley and one of the best in Eastern Kentucky, besides having the most picturesque scenery. Surrounded as it is by vast mineral resources, it only awaits the development of this region to become a large and important city. There are no saloons in the town, or nearer than twenty-five miles.

It is easy of access by river in season, and by daily hack from Williamson, W. Va., on N. & W., and with the C. & O., at Whitehouse, Ky. We have daily mail from each of these places.

EXPENSES.

TUITION.

Collegiate course, per term	\$6 00
Preparatory course, per term	5 00
Primary and Intermediate, first two terms, per term.....	4 00
Tuition in Primary and Intermediate for the last two terms will be announced at the beginning of the year.	
Music alone, per term	7 50
Academic students studying music	6 00

BOARDING.

Boarding in Hendrick's Hall, per week	2 50
Boarding in private families may be had at from \$2 to \$3 per week.	

Tuition and boarding in the Hall are invariably payable in advance.

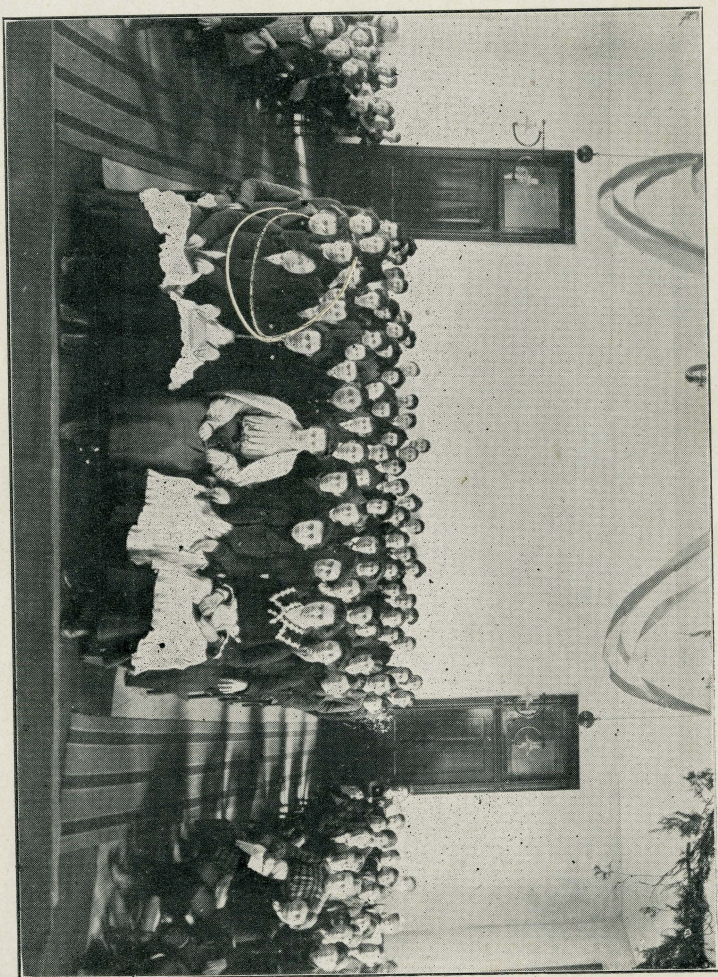

LENGTH OF TERM.

The first two quarters are eight weeks each and the second two ten weeks each. The school year is thirty-six weeks.
